

## **BESPOKE IS BEST FROM IG LINTELS**

**Creative Lintel Solutions from IG Lintels, part of the market leading Keystone Group, is a new brochure highlighting IG Lintels' extensive range of custom-made Steel Lintels and bespoke lintel design service coupled with its impressive service delivery capabilities.**

Since its acquisition by Keystone, IG Lintels is now able to supply custom-made lintels for special building designs with the same unrivalled service the industry has come to expect from Keystone Lintels.

Already supplying a comprehensive range of standard lintels for conventional building applications to architects, merchants, contractors, major housebuilders and end users, IG Lintels has increased its product development to offer these customers an extended selection of 'special' lintels, in-line with Keystone's broad product portfolio.

Where a structure requires more unconventional support, or where the building design cannot be realised with standard systems, Creative Lintel Solutions from IG Lintels provides the most cost and time-effective solution.

Backed by extensive technical know-how and a highly efficient and personal customer service, along with a well-established reputation in the industry, the IG Specials range meets the needs of architects for both residential and commercial structures.

"Whatever the requirements, IG Lintels' customers can expect to receive bespoke lintels onsite in days, not weeks." explains Derrick McFarland of IG Lintels.

For more information about IG Lintels' Creative Lintel Solutions visit [www.igltd.co.uk](http://www.igltd.co.uk) or to receive a copy of the new brochure call 01633 486486.
